## Trademark Industries Inc. – Southlake Support

### Markham, ON:

Amongst the outbreak of Covid-19 local hospitals have been working around the clock to help treat and contain the Covid-19 virus. The hospital workers are the true heroes who have put their families and lives on hold to help treat critically ill patients to promote a positive outcome from the infectious disease that has taken so many lives.

Trademark was looking for ways to show our gratitude to one of our partner hospitals and graciously donated lunch to all of the members of the Multidisciplinary Critical Unit at Southlake Regional Health Centre.

It was met with a genuine appreciation from the staff and just a small token of what Trademark could do to show its thanks for all of the efforts put forth by Southlake.

V.P Shlomo Bohbot said “It’s a small gesture but knowing the tireless hours and amazing attitude of the entire team of the Critical Care Unit it was the least we could do to show our thanks for the hard work and dedication Southlake it putting forth to save lives.”
