

**FOR IMMEDIATE RELEASE:**

January 22, 2021

**Trademark Industries Inc. – Sick Kids Hospital**

**Markham, ON:**

Leukemia is a commonly diagnosed cancer within children in Canada. Thousands of children are diagnosed with this deadly cancer and few have the resources to maintain cost of living and costs associated with the treatments. This puts additional strain on the families trying to overcome grief and financial constraints.

Trademark is pleased to support Sick Kids Hospital by contributing annual donations to help children like Emily battle her illness and bring a little bit of hope to her and her family. Trademark was overwhelmed with gratitude when we received a letter of thanks.

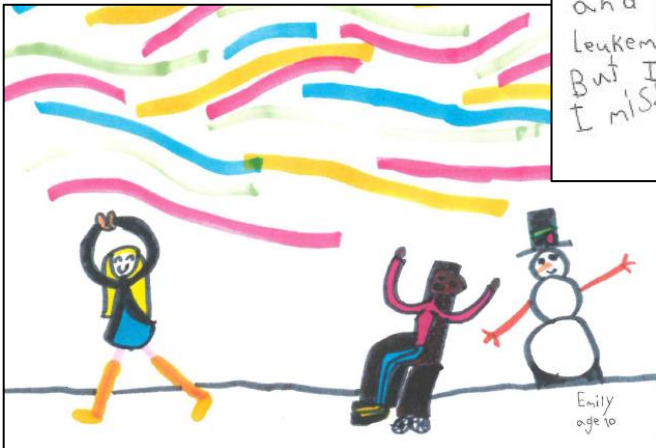

V.P Shlomo Bohbot said “Sick Kids foundation is a charitable organization that I support regularly. Having kids of my own, I cannot imagine the stress of a Leukemia diagnosis would have on a family.

Trademark makes every effort to support in whatever ways we can to at least minimize the stress. It brought tears to my eyes to see that Emily has finally gotten to a place to be able to play with her friends again. And that is the real win!”

Dear Shlomo.

ThankS So much for Supporting Kids like me. when I was 3, SickKids doctors found out that I had leukemia. I had to stay at SickKids for a long time. I was often too tired to play with my friends even when I was at home. But now I'm 10, and thankS to help from donors like you, my leukemia is gone! I still have checkups at SickKids but I can play with my friends when ever I want! I missed them a lot

you're the best!  
love, Emily♡
